ton Show*

FUCHSIA QUEEN

1946 Introduction

- Bright Fuchsia Purple in color, with darker feather in throat. Tall Grower. Stretchy flower head 18-20 buds, 5-6 open, 4½"-5" blooms. 8 showing color.
- Mid-season, blooms with Picardy, of which it is originated.
- We believe FUCHSIA QUEEN will eventually become a commercial variety, because of its clear color, strong healthy stalk (5 feet tall), prolific producer in bulblets.
- A splendid Florists' variety, FUCHSIA QUEEN was originally intended for our own Florist's Trade; since it was admired so much we have decided to share it with the growers.

FUCHSIA QUEEN
